

final_project_pagination_plan

#439#

- Which pages in your Final Project will include pagination features? Why these? Why not others?

The list of the flight route, because in my project I have many flight route and I want to make this include pagination so it can make the website show only few information in one page

- How many test instances will you need to create in order to test the pagination features?

About 200 instance I think is enough

- Where will you get or how will you generate the test data values?

Maybe generate form the online generate tools

- How could you adapt the data migration code used in the first part of this assignment to load test data values of your own?

I can change the list information of the migration data
