

final_project_gcbv_plan

#439#

- How much effort on average do you estimate it will take to refactor a view to use GCBVs?
I think it will cause me about 1 hour to refactor the view.

- Based upon the estimate above, what do you estimate it will take to refactor all of your views?

I think it will take me about 8 hour to do the refactor

- Do you have any views in your Final Project that do not lend themselves to using GCBVs?
Why not?

I think I will not use the GCBV in the update because I want to make some change to the update

How many lines of code do you estimate would be eliminated from your Final Project by refactoring to GCBVs?

I think about 200 line code will be eliminated from my final project
